# MEET OUR *founder*

**DR. BEULAH VAN DER WESTHUIZEN**

EduExcellence was conceptualised and founded by Dr. Beulah van der Westhuizen in 2006, an Educational Psychologist and specialist in neuro-development. Extensive research in educational neuroscience contributed to the design of TheraEd™ an approach she has coined which forms the cornerstone of EduExcellence.

15 years later, and EduExcellence PRS Group now has a national footprint with physical Campuses in both Gauteng and the Western Cape, as well as Online, International.

"Education should be deeply personal, as personal as the individual being educated."

*-Dr Beulah van der Westhuizen*

# MISSION

*statement*

The EduExcellence PRS Group Mission is to provide an inclusive educational service where learners are offered quality education that recognises their unique learning needs, challenging them to perform at their optimal level. Underpinned by educational neuroscience, we recognise that a good academic curriculum must be supported by focused, emotional, social, physical and spiritual curriculums.

EduExcellence offers bespoke, personalised education for remedial learners focusing on emotional and social development, sensory-motor integration as well as cognitive and academic achievement - both in-person and online.

We offer a comprehensive, neuro-developmental assessment, small classes, and a therapeutic and sensory-sensitive environment.

Low-GI meals are served daily.

Meals and therapy are inclusive of our school fees.

# WHAT ARE YOU WAITING FOR?

*join our EduExcellence family!*

Our unique approach is based on educational neuroscience and has been tested and proven over time.

The TheraEd philosophy is one where we create a therapeutic educational environment where children feel safe and nurtured in order to learn and thrive. Daily neuro-developmental activities are presented to build the underlying neurological pathways needed for living and learning. We know that in order to successfully read, write and do arithmetic, they need to have the building blocks to support these activities. EduExcellence remedial schools assists learners in emotional and social development, sensory-motor integration as well as cognitive and academic achievement - both in-person and online
